

CEOI CHALLENGE WORKSHOP

FUTURE EO MISSIONS AND INSTRUMENTS

10.00 am, Monday 30th April 2018

Objectives

The workshop is part of a project on behalf of the UK Space Agency's Earth Observation Advisory Committee (EOAC) to develop a list of UK EO Mission and Instruments Candidates. The main objective of the workshop is to review proposals for missions/instruments which were submitted to the Panel earlier this month. These are for UK national projects, or as a bilateral, or through ESA (including InCubed). Missions/instruments should be near flight-ready.

Draft Agenda

10:00	Welcome and introduction to CEOI	Mick Johnson, Director of CEOI
10.10	Scope and Goals of the EO Mission Capability Review (EOMCR)	Beth Greenway, UKSA
