

## CEOI 12th Call for Earth Observation Technology and Instrument Development Proposals

**Clarification 1**                      **Fast Track Project Duration**

**Reference**                              Fast Track grants are expected to be up to 15 months duration. Proposals for projects with a longer duration may be considered, but full justification must be provided.

*The maximum expected duration for Fast Track projects was initially incorrectly stated as 18 months on the CEOI website. This has been corrected to be 15 months, as stated in the Announcement of Opportunity document.*

**Date of Release**                      1<sup>st</sup> February 2019

**Clarification 2**                      **[RD6] UK Space Agency document: Earth Observation and Climate:  
Vision to 2040**

**Reference**                              Announcement of Opportunity document  
(Page 1, Section 1.1 Reference Documents)

**Date of Release**                      1<sup>st</sup> February 2019

The document has not been published. Information about the UK Space Agency 'EO Vision to 2040' can be found in [this presentation from the 2018 National EO Conference](#)
